

Final Report

Table of contents

1. Introduction	1
2. Methods	1
2.1 Data source	1
2.2 Data cleaning and wrangling	1
2.3 Exploratory tools	2
2.4 Modeling	2
3. Results	2
4. Conclusions and Summary	2

The rendered PDF is available for download: [report.pdf](#)

1. Introduction

Background on the topic and data. State the research question(s) / hypothesis(es). Narrative of the topic and why it matters.

2. Methods

2.1 Data source

TBD — where the data came from, how it was obtained, the time window, the size of the dataset.

2.2 Data cleaning and wrangling

TBD — missing values, type conversions, derived variables, filtering rules.

2.3 Exploratory tools

TBD — summary statistics, static plots, interactive plots (see the [Interactive Viz](#) page).

2.4 Modeling

TBD — chosen course-covered method (XGBoost / Random Forest / GAM / LDA). Feature engineering. Train/validation/test split. Hyperparameters. Metrics reported (R^2 , RMSE, MAE, ROC/AUC, ...).

3. Results

TBD — publication-ready, numbered, captioned tables and figures. Reference the website for interactive versions.

Figure 1. *Caption placeholder.*

Table 1. *Caption placeholder.*

4. Conclusions and Summary

TBD — interpret findings in the bigger picture, connect back to the research question, state limitations and possible extensions.
